Dear Mr Waters

RE: Reference

Oceanic Broadband Solutions Pty Ltd were selected by the Northern Territory Department of Education and Training as part of the NT Schools tendering process to deliver a solar/wind powered outdoor wireless network to Elcho Island.

Oceanic designed, installed and continues to support a private wireless network to the remote homeland schools of Shepherdson College, Galiwinku, Gunpurra and Djurrandi on Elcho Island, East Arnhem for the Department of Education and Training (DET).

Using outdoor wireless mesh technology, uniquely developed non-concrete towers and solar/wind powering, allows 50km of harsh terrain to be covered by a high bandwidth network. Any school can communicate with any other school and carryout video conferencing, voice and video calling or access the DET Local Area Network.

The solar/wind powered network can provide teachers and students free local mobile WiFi phone calls, broadband internet access and video calling using WiFi mobile video phones.

As part of the project Oceanic provided class room and practical based operational and maintenance training for the students and staff at Shepherdson College.

The Northern Territory Department of Education and Training found Oceanic an ideal partner to work with. They provided a turnkey solution for the department that has successfully integrated with our high security network. Their installation and support service was fast and efficient.

Yours sincerely

Andrew Street
Director, ICT for Learning
