Oceanic Broadband Solutions Pty Ltd
Ground Floor
527 Hampton Street
Hampton, Victoria 3188
Australia

Dear Tony,

Thank you for all of your assistance with our projects here in Papua. Oceanic Broadband is a key part of the successful installation, support and operation of our Vsat systems. We look forward to many more opportunities of continued relations.

In the case of the Moi tribe in Wanimo, your technical assistance and support allowed us to complete an installation in a very remote and isolated area. It is over an hour flight by small plane from the nearest town to the Moi site and getting things right the first time are both timely and economically critical. Your cooperation of setting the system up ahead of time and performing integrity tests made this all possible. The families working in this isolated village have enjoyed a whole new world of communications. They are now able to stay in touch with children away at boarding school and work more efficiently with regular contact to headquarters support.

Your efficient and quick provisioning allowed us to meet time critical deadlines for our United Nations Development Program (UNDP) contract in Ninia. The UNDP Telecenter project in Ninia is now up and running ahead of schedule thanks to your team's support. The ease of working with you and your technicians takes a huge burden off of our staff that already is pushed to logistical limits of dealing with difficult transportation and problems associated with isolated remote installations. Thank you for helping us reach our goals.

We appreciate your professionalism and ease of working with you. Please let us know if you ever need references. We rate Oceanic Broadband as A++ in service, support and overall expertise.

Sincerely,

David Haag
President
